

**Dental disease is the number one disease among children.**

Percentage of Children With Untreated Cavities by Family's Income Percentage

- Dental disease contributes to more ER visits than asthma and diabetes combined.
- The lowest 25% income families have 80% of the dental disease.
- 41% of third grade low income children have untreated tooth decay.
- 51 million school hours are lost each year to dental disease.
- 100% of dental disease is preventable.

**Minorities are extremely underrepresented in the field of dentistry.**

Enrollees by Race and Ethnicity in U.S. Dental Schools, 2006 - 2012

Source: American Dental Education Association

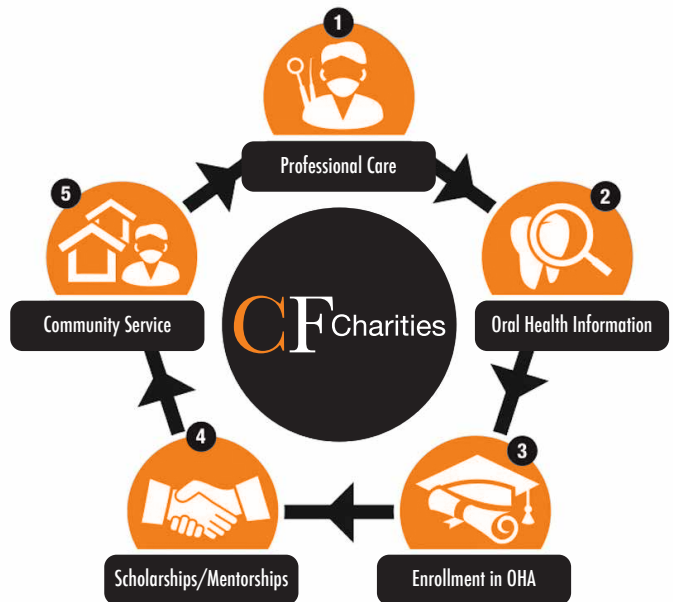

- As a result of suffering a personal experience of limited or poor care, most disadvantaged children rarely enter into dentistry as a career.

- Inner-city high schools often lack the resources to prepare students for a career in dentistry.
- Dental school students accumulate between \$150,000-\$400,000 of debt without assistance.

**The CF Charities Solution**

Using the Resilient Public Healthcare Model, CF Charities takes a "complete cycle" approach to care, education, training, mentorship and giving back to the community to break the cycle of poor oral healthcare and provide a positive career path for students in need.

The Resilient Public Healthcare Model

**Oral Health Care Professionals begin by:**

- 1. Making compassionate dental and oral health care services available to children and students at school.
- 2. As this care continues into students' middle school years, CF Charities Oral Health Academies, in conjunction with school districts, inspire students with information about the pursuit of dental and oral health careers.
- 3. During the high school years, CF Charities opens enrollment into the Oral Health Academies, guiding top-tier students toward career opportunities in dentistry and brighter futures.
- 4. For Oral Health Academy students that are graduating high school, CF Charities offers educational assistance via scholarships, internship programs and mentorship upon graduation, and completing the cycle of giving back to the community, CF Charities/Oral Health Academy sponsored students are required to provide dental service in a public health setting in return for the education assistance they received.

**September  
2010**

Successfully established the Oral Health Academy (OHA) at the A. Philip Randolph Career Academy, in partnership with the School District of Philadelphia.

**June  
2013**

The Oral Health Academy at the A. Philip Randolph Career Academy graduated its first class of five students for the 2012-2013 school year.

**September  
2013**

An OHA program was implemented at the Vivien T. Thomas Medical Arts Academy in Baltimore.

**December  
2013**

CF Charities established dual enrollment with Philadelphia University so that OHA students can experience classes on a college campus and graduate high school with college credits at no cost.

**January  
2014**

CF Charities established a collaboration with Philadelphia Youth Network, a local non-profit, which assists in identifying job shadowing and internship opportunities for OHA students. Partnerships were also expanded to include United Health Group-Americhoice, Keystone First, Health Partners, National Dental Association and New Era Dental Society.

**June  
2014**

Six students graduated from the OHA at A. Philip Randolph Career Academy.

**September  
2014**

The third OHA program was established at the Kensington Health Sciences Academy in Philadelphia.

**2016**

CF Charities plans to create a total of six OHA programs.

**2018**

CF Charities expects a total of 100 graduates to have completed the curriculum at one of its OHA programs annually.

**2020**

CF Charities anticipates a total of ten OHA programs operating in ten schools nationally.

**2024**

CF Charities hopes to have provided over 150 scholarships per year to students who have completed the OHA program and will move on to college courses in the field of dentistry.
